REPORT OF THE VICTORIAN RAILWAYS COMMISSIONERS
FOR THE YEAR ENDING 30TH JUNE, 1913.

VICTORIAN RAILWAYS,
Commissioners' Office, Spencer-street,
Melbourne, 27th September, 1913.

To the Honorable the Minister of Railways.

SIR,

In conformity with the provisions of Section 59 of the *Railways Act* 1890, No. 1135, we have the honor to submit, for the information of Parliament, our Report in respect of the year ending 30th June, 1913.

The financial results of the working of the Railways during the period under review were as follows:—

	£	s.	d.
GROSS REVENUE	5,205,442	5	9
WORKING EXPENSES	3,476,956	17	11
NET REVENUE	1,728,485	7	10
NET REVENUE OF ST. KILDA and BRIGHTON ELECTRIC STREET RAILWAY	1,021	7	0
TOTAL NET REVENUE	1,729,506	14	10
INTEREST CHARGES and EXPENSES	1,595,019	15	7
PENSIONS and GRATUITIES	112,236	13	8
	1,707,256	9	3
SURPLUS	22,250	5	7

Comparison of the Financial Results with those of the Preceding Year.

SURPLUS	155,097	282,975	265,791	22,250

* Exclusive of St. Kilda and Brighton Electric Street Railway.

(a) Includes Special Payment, in year 1909-10, £75,000; in year 1910-11, £66,905; in year 1911-12, £25,400; and in year 1912-13, £26,027.—(b) For details see Appendix No. 21.

Gross Revenue.

The Gross Revenue was £13,525 (or equivalent to 0·3 per cent.) less than that of the preceding year, which had constituted a record, and the Gross Revenue per traffic train mile was 7s. 3·77d., by comparison with 7s. 6·53d.

The increases and decreases in the Revenue derived from the different subdivisions of both passenger and goods traffic were as shown hereunder:—

	Increase.		Decrease.		Net Decrease.	
	Amount.	Per cent.	Amount.	Per cent.	Amount.	Per cent.
	£		£		£	
Passengers—						
Country	40,011	2·97
Suburban	81,407	8·49
Total	121,418	5·26				
Dining Car Service	1,354	9·52
Parcels, &c.	11,143	5·38
Horses, Carriages, and Dogs	58	·27
Mails	3,813	5·12
Goods	136,895	6·56
Live Stock	12,961	4·04
Minerals	4,488	4·46
Rentals	831	1·16
Miscellaneous	2,318	14·44
Total	140,877	...	154,402	...	13,525	0·3

The passenger business, both in the country and in the suburbs, continued to expand in a satisfactory manner, but on the other hand there was an appreciable falling off in the goods traffic, and the increases and decreases in the revenue obtained from the carriage of the different classes of goods were as indicated in the following statement:—

Class of Goods.	Increase.		Decrease.	
	£	£	£	£
Wool	41,483
Wheat	16,290
Agricultural Produce other than Wheat	2,838
Firewood and Timber	38,925
Butter and other Dairy Produce	11,250
Fertilizers A.	5,059
Stone, Gravel, and Sand	7,272
Fish, Fruit, and Wine	1,719
Class "A," "B," "C," 1, and 2	22,018
Miscellaneous	6,501
All other Goods	13,909
Haulage, Storage, Demurrage, &c.	3,407
Total	16,888	153,783		
Net decrease			£136,895	

Working Expenses.

The Working Expenses are contrasted in detail with those of the preceding year in Appendix No. 21.

The percentage of Working Expenses to Gross Revenue was 66·79, as compared with 63·43 in the year 1911-12.

The increase in the Working Expenses was distributed as follows :—

					Increase.
					£
Transportation Branch	46,844
Way and Works Branch	37,016
Rolling-stock Branch—					
Operating Expenses	72,271
Repairs and Renewals	3,083
General Expenses	6,700
Payment into Railway Accident and Fire Insurance Fund...					559
Total	£	166,473

and was due to—

- (a) The additional train mileage, viz., 398,175 miles, which was in a considerable measure occasioned by the provision, in accordance with the directions of the Government, of at least one passenger train daily to and from Melbourne and every town with a population of at least 2,000 inhabitants ;
- (b) The increased scale of payment and the improved working conditions provided for the staff ;
- (c) The increased wages paid to certain supernumerary artisans in accordance with new or amended Wages Board Determinations ;
- (d) The operation and maintenance of the new lines of railway from Noradjuha to Toolondo and Jeparit to Lorquon, and of the lines from Cressy to Newtown, Ouyen to Cowangie and Murrayville, and Eltham to Hurstbridge, which were open for only a portion of the preceding year ;
- (e) The increased price of coal, oil, materials and other stores ; and
- (f) The maintenance of additional locomotive and other rolling-stock.

Net Revenue.

The Net Revenue after the payment of Working Expenses and of Pensions and Gratuities was equivalent to 3·56 per cent. of the total liability in respect of current loans allocated to the railways.

Decrease in Surplus.

The factors contributing to the diminution in the Surplus, as compared with the preceding year, may be briefly stated thus :—

Surplus for year 1911-12	£	265,791
Year 1912-13—					
Decrease in Revenue	13,525	
Decrease in Net Revenue, St. Kilda and Brighton Electric Street Railway	708	
Increase in Working Expenses	166,473	
Increase in Interest Charges and Expenses	81,918	
				<u>262,624</u>	
Less Decrease in Pensions and Gratuities	19,083	
				<u>243,541</u>	
Surplus for year 1912-13	£	<u>22,250</u>

Broadly speaking, the comparatively unfavorable result is due to the concessions in freight charges, which were made in January, 1912; to the improved train facilities which have been provided in a greater proportion than the increase in traffic; to the higher cost of materials, &c.; to the increased interest charges; and to the very appreciable concessions which have been made to the staff.

The payment of increased wages and of higher prices for materials, &c., is not limited to this State, as conditions of a like character have been, and are, operative in the other States, and in different parts of the world, and these factors are exercising, and will continue to exercise, a material influence on the financial results achieved by the Railways.

The occasion is therefore opportune to direct attention to the obligations of the current year and to the necessities of the future. The development of business during the past few years has been so marked that it will be essential to continue to incur heavy expenditure at a number of stations in order to increase the accommodation and so provide facilities for the efficient and economical handling of the growing traffic. The renewal and duplication of the Flinders-street Viaduct; the regrading and duplication of the line from South Yarra to Caulfield; the regrading of the line from Richmond to East Camberwell; the provision of a new and larger Shipping shed at Montague; the re-arrangement and enlargement of the stations at Ararat, Benalla, Bendigo, Castlemaine, Colac, Geelong, Korong Vale, and Warragul; the provision of a new Locomotive depôt at Geelong; the remodelling and practically the reconstruction of Spencer-street station, and the electrification of the suburban lines may be instanced as some of the principal works which are in progress, or which will require to be undertaken in the near future.

These works will not only entail much capital outlay, but will also involve a considerable contribution from the Working Expenses, and it is probable that both Interest Charges and Working Expenses will for some time progress in greater ratio than any increase which can reasonably be anticipated in the revenue, and this aspect will have to be borne strongly in mind in the consideration of any question involving further concessions, in the way of either fares and freights or improved train services.

Payment Received under the Provisions of Section 14 of Act No. 1439.

The following sums were appropriated by Parliament and paid to the Department under the provisions of Section 14 of Act No. 1439, viz.:—

	£	s.	d.
For decrease in the revenue due to the carriage of Victorian Coal at reduced rates ...	9,563	19	1
For increase in the working expenses owing to the purchase of Victorian Coal other than from the State Coal Mine at prices fixed by the Government	1,938	17	7
	£11,502 16 8		

Railway Accident and Fire Insurance Fund.

A special payment of £26,111 (including £84 in respect of the revenue of the St. Kilda and Brighton Electric Street Railway) was credited to the Fund, and debited against the Working Expenses for the year, in addition to the usual statutory contribution of 10s. for every £100 of Gross Revenue. The total amount credited to the Fund during the year, including a contribution of £168 in respect of the revenue of the St. Kilda and Brighton Electric Street Railway, was £52,223, *vide* Appendix No. 10.

Pensions and Gratuities.

The amounts paid in pensions and gratuities (to ex-officers and ex-employés or to their dependent relatives) were £104,098 and £8,138 respectively, or a total of £112,236, as compared with £106,358 and £24,961 respectively, or a total of £131,319, in the preceding year.

The decrease in the amount of the gratuities was due to the restoration in the year 1911-12 (*vide* Act No. 2329) to the enginemén and others who participated in the Strike in 1903, of full pension and compensation rights up to the date of retirement, in accordance with the practice in vogue prior to that year, and which necessitated payments of increased gratuities to certain of these employes, and to the dependent relatives of others who left the service subsequent to 1903, and consequential payments to certain ex-officers and ex-employés or to their dependent relatives whose gratuities had only been computed in respect of the period up till 3rd March, 1903.

Capital Expenditure.

The total expenditure charged to Capital Account at 30th June, 1912, was 45,897,163 6 0
and during the year under review the expenditure so charged was as follows (for further details see Appendix No. 6):—

	£	s.	d.
Construction of New Lines—			
White Cliffs—Yelta	1	7	0
Ouyen—Kow Plains (Cowangie)	10,525	15	11
Kow Plains (Cowangie)—Murrayville... ..	5,216	13	8
Crowland—Navarre	25,992	6	7
Sea Lake—Pier Millau	12	10	9
Ultima—Chillingollah	446	15	8
Chillingollah—Manangatang	11,539	18	1
Swan Hill—Piaungil	15	15	3
Elmore—Cohuna	13	10	3
Becac—Newtown	3,346	9	6
Beech Forest—Crowe's	1,373	15	5
Gheringhap—Maroona	149,917	8	1
Linton—Skipton	1	16	0
Hamilton—Cavendish	12	1	0
Rupanyup—Marnoo	46	2	0
Noradjuha—Toolondo	8,100	19	8
Jeparit—Lorquon	14,314	1	11
Rainbow—Nyppo	10	9	1
Rushworth—Colbinabbin	8,160	18	9
Benalla—Tatong	5,019	2	8
Tallangatta—Cudgewa	201	11	11
Eltham—Hurst's Bridge	5,090	19	4
Woolamai—Powlett Coal Fields (Wonthaggi)	12,930	17	4
Moe—Wathalla	1,875	12	1
Bairnsdale—Orbost	118,968	16	10
	383,135	14	9
Surveys	14,779	7	3
	<hr/>		
Total Increase in Capital Expenditure to Construction of New Lines and Surveys	397,915	2	0
Additions and Improvements to Existing Lines, and to Rolling-stock—			
Way and Works	£544,605	19	7
Rolling-stock	816,784	16	5
	<hr/>		
Total Increase in Capital Expenditure for Additions and Improvements to Existing Lines and to Rolling-stock	1,361,390	16	0
	<hr/>		
Total Increase in Expenditure on Capital Account	£1,759,305 18 0		
	<hr/>		
so that the total expenditure charged to Capital Account at 30th June, 1913, was	£47,656,469 4 0		
	<hr/>		

Loan Funds.

The total liability in respect of Current Loans allocated to the Railways, at 30th June, 1912, was £ 44,149,951 4 9 and during the year under review the additional amount allocated was as follows :—

	£	s.	d.	£	s.	d.	
Additional Loans raised for or transferred to the debit of the Railways by the Treasury.	For Construction Works—						
	Act 1753 (3 per cent.) ...	1,574	13	2			
	Act 2041 (3½ per cent.) ...	15,496	9	9			
	Act 2161 (3 per cent.) ...	91,454	8	6			
	Act 2308 (4 per cent.) ...	49,781	13	9			
	Act 2323 (3½ per cent.) ...	732,693	13	8			
	Act 2429 (3 per cent.) ...	5,400	0	0			
	Act 2429 (3½ per cent.) ...	350,130	17	3			
	Act 2429 (3¾ per cent.) ...	10,000	0	0			
		<hr/>			1,256,531	16	1
	For Repayment of Advance pending issue of Securities—						
	Act 2026 (3½ per cent.) ...				50,000	0	0
		<hr/>			1,306,531	16	1
	Less Amount redeemed from Revenue—						
Act 1451 (3¼ per cent.) ...	6,638	19	9				
Act 2308 (4 per cent.) ...	150	0	0				
	<hr/>			6,788	19	9	
	<hr/>			1,299,742	16	4	
Less Advances Repaid by Act 2026 ...				50,000	0	0	
	<hr/>						
Net Increase for the year ...				£1,249,742	16	4	
so that the total liability in respect of Current Loans allocated to the Railways at 30th June, 1913, was (<i>vide</i> Appendix No. 7)				£45,399,694	1	1	
The proceeds of Loans allocated to the Railways, after deducting Discounts and Expenses (less Net Premiums received), amounted at 30th June, 1912, to				£42,760,685	17	3	
and as this amount was increased during the year ending 30th June, 1913, by				1,232,487	14	9	
the total proceeds of Loans allocated to the Railways at 30th June, 1913, was				£43,993,173	12	0	
The difference for the year between the increase in the proceeds of the Loans allocated to the Railways and the increase in the total amount of Current Loans allocated, which represents the Net Discount and Expenses for the year in raising Loans for Construction Works, was ...				£17,255	1	7	

Interest Account.

	£	s.	d.
The Interest on Current Loans allocated to the Railways (<i>vide</i> Appendix No. 7) amounted during the year to	1,583,484	17	4
And in addition the Railways were debited with—			
Expenses incurred by the Treasury in connexion with Payment of Interest, amounting to	£4,449	5	3
Interest on Temporary Advances pend- ing Loan Moneys being raised	7,085	13	0
		<hr/>	<hr/>
		11,534	18 3
so that the debit for Interest and Expenses for the year 1912-13 was	<hr/>	<hr/>	<hr/>
	£1,595,019	15	7

This amount represents an increase of **£81,918** in the interest charges and expenses as compared with the debit for the previous year.

Non-Interest Bearing Funds.

The amount provided out of Consolidated Revenue for the Construction, Equipment, Stores, &c., of the Railways, and on which interest is not charged, was at 30th June, 1912 ...	£3,881,719	14	0
and further moneys (expended under Vote 161) were provided during the year out of Consolidated Funds and debited to Construction Works, to the extent of		2,357	2 9
whilst the amounts provided during the year out of the Consolidated Revenue for the Redemption of Loan Moneys allocated to the Railways aggregated		6,788	19 9
		<hr/>	<hr/>
The total amount so provided as at 30th June, 1913 (<i>vide</i> Appendix No. 5), was therefore	£3,890,865	16	6

Capital Expenditure incurred in respect of Lines now Closed for Traffic, and for Surveys of Lines not constructed, on which Interest is charged against the Railways.

Lines Closed for Traffic.	Miles.	Approximate Capital Cost.
Dunkeld to Peshurst (dismantled)	15·87	... £50,000
Canterbury Loop Line (dismantled)	0·20	
Ashburton to Oakleigh	2·37	... 160,000
Fairfield Park to Deepdene	3·34	
Darling to Waverley	0·84	... 7,000
Lancefield to Kilmore	18·10	... 117,207
Fawkner Cemetery to Somerton	5·28	... 53,217
Geelong Race-course Line (dismantled)	1·96	... 5,317
	<hr/>	<hr/>
Totals	47·96 miles	£392,741
	<hr/>	<hr/>
Surveys of lines not constructed	£374,064
	<hr/>	<hr/>
Grand Total	£766,805

The interest upon this capital, which is wholly non-reproductive, would, on the basis of the average rate of interest charged for the year, amount to **£26,915**.

St. Kilda and Brighton Electric Street Railway.

In order to admit of the provision of an adequate service for the growing traffic on this line, the section between St. Kilda and the Elwood Power House has been duplicated, and a five-minute service has since been in operation over that section during the busy hours of the day with a ten-minute service thence to Brighton Beach. Arrangements have also been made for the construction of extra crossing loops between the Power House and the Brighton Beach Terminus, so as to enable a five-minute service to be provided over the whole of the line during the busy portions of the day.

The results of operating the line, by contrast with those of the preceding year, are shown in detail in Appendix No. 22.

The Capital Expenditure at 30th June, 1913, on account of the construction of the line was	£65,944
and for Rolling-stock	£22,189
					£88,133
or a total of	£88,133

The increase for the year amounted to £27,543, and is mainly represented by the cost of the duplication of the line between St. Kilda and the Power House (£20,364) and by the cost of new rolling stock to provide the additional services (£5,796).

The Gross Revenue was £16,829, or an increase of £1,817 over that earned during the preceding year.

The Working Expenses, which include £1,846 incurred upon the renewal of the track in connexion with the duplication of the line from St. Kilda to the Power House, and additional expenditure due to the increased wages paid to the staff and the extra car mileage, amounted to £15,808—an increase of £2,525 as compared with the year 1911-12.

The Net Revenue was, therefore, £1,021—a decrease of £708 as compared with the preceding year, and £2,072 less than the interest on the capital invested.

The car mileage was 413,939 miles—an increase of 46,633 miles—and the number of passengers carried was 1,916,618, or an increase of 241,700 as compared with the preceding year.

New Lines Opened for Traffic.

The lines of which particulars are shown hereunder were opened for traffic during the year:—

Line.	Miles.	Date Opened for Traffic.
Noradjuha to Toolondo	11'24	24.9.12
Jeparit to Lorquon	13'68	10.12.12

New Lines Under Construction, or Authorized.

The following new lines, all of 5 feet 3 inches gauge, were in course of construction at 30th June, 1913:—

Line.	Miles.
White Cliffs to Yelta	9'75
Gheringhap to Maroona	100'75
Bairnsdale to Orbost	60'00
Crowland to Navarre	23'00
Benalla to Tatong	18'25
Rushworth to Colbinabbin	12'00
Chillingollah to Manangatang	18'50
Total	242'25

The construction of the following authorized lines, of 5 feet 3 inches gauge had not been commenced at 30th June, 1913:—

Line.	Miles.
Tallangatta to Cudgewa	42 $\frac{1}{2}$
Swan Hill to Piangil	27 $\frac{1}{2}$
Sea Lake towards Pier Millan	17 $\frac{3}{4}$
Heywood to Mumbanuar	39 $\frac{1}{2}$
Elmore to Cohuna	57 $\frac{1}{2}$
Hamilton to Cavendish	15 $\frac{3}{4}$
Rainbow towards Nypo	10 $\frac{3}{4}$
Linton to Skipton	12 $\frac{3}{4}$
Total	224

Mileage of Railways and Tracks Open for Traffic.

The route mileage open for traffic at the end of the year, and the average mileage open during the year, together with similar information in respect of the mileage of the main tracks, and of sidings, as compared with the year 1911-12, were as shown hereunder:—

	Year 1911-12.	Year 1912-13.
	Miles.	Miles.
Route Mileage... ..	3622'36*	3647'28†
" average during year	3543'31	3638'56
Main Tracks	3962'66 ²	3989'58†
" average during year... ..	3883'61	3979'85
Sidings	651'58*	679'86†
St. Kilda and Brighton Electric Street Railway—

Sidings... ..	·83*	·83†

* At 30th June, 1912.

† At 30th June, 1913.

Concessions to the Staff.

In consequence of the increase in the cost of living and of the gradual betterment in the conditions of employment generally it has been necessary to make appreciable concessions to the staff during the past few years, both by the adoption of a higher scale of wages for many grades and by other improvements in the

working conditions, and the influence which such concessions have had upon the working expenses is indicated in the following statement relating to the period since the year 1909-10, inclusive:—

	Year ending 30th June.				Total for four years.
	1910.	1911.	1912.	1913.	
	£	£	£	£	£
Increases in salary and wage under Regulation 54, which became operative on 1st June, 1911, represented an addition to the Working Expenses of	6,900	100,300	106,300	213,500
and under Regulation 56, which became operative as from 1st October, 1912, a further addition of	25,650	25,650
	...	6,900	100,300	131,950	239,150
Other concessions in respect of travelling time, overtime, &c., under Regulation 54 represented additions to the extent of	1,600	19,000	19,000	39,600
and under Regulation 56 of	5,100	5,100
The total increase in expenditure under these Regulations was therefore	8,500	119,300	156,050	283,850
Other concessions included—					
Payment for Sunday duty on a more liberal basis	4,970	7,450	12,420
Extension of eight hours principle to all enginemen and to additional signalmen and shunters	4,200	16,100	16,800	16,800	53,900
Increase in wage of casual labourers in Goods Sheds	2,250	4,500	4,500	11,250
Increase in wage of Supernumerary artisans and others owing to new and amended Wages Board Determinations ...	1,310	2,450	15,300	18,100	37,160
Privilege of half fares to and from work ...	6,000	6,000	6,000	6,000	24,000
and the total addition to the Working Expenses owing to increases in pay and concessions was therefore approximately	11,510	35,300	166,870	208,900	422,580

The amount of £208,900 represents the actual additional expenditure in the year ending 30th June, 1913, due to concessions which became operative not only in that but also in the preceding three years, or, in other words, the working expenses in the year 1912-13 would have been £208,900 less had the same conditions and wages been in effect as in the year 1908-9.

This statement does not take into consideration the additional amount—approximately £72,000 per annum—involved in the further concessions which became operative as from 1st July, 1913; nor ordinary divisional increments which would have been granted irrespective of the alterations in the classification.

The remuneration of the staff generally and the conditions under which they are at present employed are undoubtedly better than at any period in the history of the department, and the bulk of the advances in pay and other improvements which have been made under Regulations 54 and 56 and which will be made under the Regulation now in process of evolution has been and will be of benefit to the wages staff.

It is our desire that the staff be granted reasonable rates of pay, having regard to all the surrounding circumstances, and that the salaries and wages should neither be inflated in times of unusual prosperity nor subjected to deduction in periods of depression or of financial stringency. This viewpoint has been kept in the foreground in connexion with the compilation and revision of the different Regulations, and we feel that as soon as the revised scale of wages, which is now in course of

preparation, has been brought into complete operation, together with other contemplated concessions, all reasonable demands for higher remuneration and betterment of conditions will have been satisfied, and that so long as existing conditions prevail there will not be justification for any material or general increase in the rates of pay.

Electrification of the Melbourne Suburban Railways.

Mr. Charles H. Merz, who had been instructed by the Government to review the Report which he submitted in 1908, in respect of the electrification of the Suburban railways, visited Melbourne in September last, and as a result of the further investigation we supported his recommendation that the electrification of the Suburban railways be proceeded with, and, after consideration of the alternative tenders which were obtained in respect of the alternating current and direct current systems, concurred in the view expressed by him that the direct current system was the more advantageous to adopt.

Approval for the conversion was subsequently given by Parliament, and Mr. Merz was commissioned to supervise the carrying out of the work, and contracts as under, involving an aggregate expenditure of approximately £1,250,000, were immediately entered into for the portions of the scheme specified, viz. :—

Name of Firm or Company.	Contract.
Parsons and Company, England	Four 10,000 K.W. generating sets, with necessary auxiliaries.
Babcock and Wilcox, England	The complete power station buildings (except for the second boiler house, coal store, &c.), and the boiler equipment for one boiler house.
Siemens Brothers, England	Sub-station equipment to the extent of 60,000 K.W. capacity.
The General Electric Company of New York and England	Electrical equipment for 400 motor coaches and 400 trailer coaches.

Mr. Merz has since been engaged in dealing with the detailed designs and drawings in respect of these contracts, and reports that the contract work is in hand and is proceeding satisfactorily.

In order to deal with the specifications for other portions of the scheme, such as the switch gear, the condensing plant, the transmission cables, and the overhead contact lines, Mr. Merz has been supplied with a great deal of detailed information, including plans and sections of the lines. Considerable attention has also been devoted, both by the Department and by Mr. Merz, to the designs for the construction of the underframes and bogies of the motor coaches, and the arrangement of the Westinghouse brake and the alterations in the bodies of the coaches to provide for the driving equipment; whilst the location of the twelve sub-stations has been determined, and plans for some of them have been forwarded to Mr. Merz.

The arrangements in connexion with the scheme are proceeding satisfactorily, and it is confidently expected that, as originally anticipated, the first line, viz., from Sandringham to Broadmeadows, will be electrically operated about the middle of 1915, and that the conversion of the remaining lines will be carried out in quick succession, and completed during the early portion of 1917.

Electrical Engineering Branch.

In accordance with a recommendation of Mr. Merz, we decided to establish a new branch, known as the Electrical Engineering Branch, in order to deal with the electrical portion of the work of converting the suburban lines from steam to electric traction, and subsequently with the production of electrical energy for the running of trains; and Mr. W. Stone, who previously occupied the position of Electrical and Lighting Engineer in the Telegraph Branch, and who last year visited Great Britain, America, and Europe to make certain investigations in connexion with the electrification scheme, was placed in control of the Branch with the title of Chief Electrical Engineer as from 1st May, 1913.

In addition to constructional and technical matters in connexion with the electrification scheme, Mr. Stone has control of—

- (1) The Electric Light and Pintsch Gas Works at Spencer-street ;
- (2) The construction, installation, and maintenance of all electric light and power circuits and apparatus supplied with current from the Electric Light Works at Spencer-street ; and
- (3) The working and maintenance of the power-plant, rolling-stock, car sheds, workshops and overhead equipment of the St. Kilda and Brighton Electric Street Railway.

Abolition of Competitive Rates.

In pursuance of the policy of the Government to facilitate the development of the outer ports, the competitive rates which had existed for many years between Melbourne and the Eastern and Western coastal districts, and which had incidentally exerted an influence on the rates between Melbourne and certain inland portions of the State, were abolished as from 1st January, 1913. At the same time it was decided to abolish the Class 3 rate, which was the highest of the schedules, in order to obviate the imposition of unduly high rates in the areas affected ; and to compute the charges in respect of the traffic of the North-Western District by the shorter route, *via* Bacchus Marsh, instead of, as formerly, by the longer route *via* North Geelong.

By the adoption of the scheme, which involved an estimated loss of over £7,000 per annum, the general mileage scales of rates are now uniformly operative, practically throughout the State.

Duplication and Regrading of the Lines between South Yarra and Caulfield.

The work of duplicating and regrading the tracks between South Yarra and Caulfield for the purpose of improving the facilities for the handling of suburban, country, and special traffic was actively proceeded with. Satisfactory progress was made with the earthworks between Hawksburn and Armadale and Malvern and Caulfield, whilst the main Up and Down tracks were lowered to their permanent level between Armadale and Malvern. New station buildings were erected on the Down platform at Armadale, and on the island platform at Malvern, and a commencement was made with the erection of new structures at Hawksburn and Toorak.

Overhead bridges for street traffic were substituted for the level crossings at Wattle-tree Road and Glenferrie Road, and a commencement was made with the construction of bridges to replace the level crossings at Cromwell Road, Williams Road, and Malvern Road. The bridges at High Street and Kooyong Road were duplicated, and good progress was made with the widening of the bridges at Dandenong Road and Smith Road, and with the erection of a bridge to provide an under crossing for vehicular traffic at Finlayson Street.

Gravitation Shunting Yard near North Melbourne.

Satisfactory progress was made with the construction of the Gravitation Shunting Yard near North Melbourne, and which will relieve the congestion in the Melbourne Goods Yard caused by the great expansion of goods traffic during recent years, and the scheme was sufficiently advanced to admit of the Western, North-Western, and Northern Sections being brought into operation with good results in the last busy season.

The construction of the bridge over the Bendigo and Williamstown lines to connect with the North-Eastern Section is well in hand, and it is anticipated that the whole scheme will be completed in readiness for the next busy season.

Duplication of the Flinders-street Viaduct.

Operations in connexion with the duplication of the Viaduct between Flinders Street and Spencer Street were proceeded with as expeditiously as possible. The whole of the sub-structure from Market Street to Wharf Road, including the enlargement of the existing brick piers, and the foundations and brick-work below the street level in the section from Wharf Road to Spencer Street, were completed, as well as about four-fifths of the brickwork above the street level in the latter section.

Contracts were let for the manufacture and delivery of the steel work for the superstructure, and some of the material was supplied and placed in position.

Establishment of Workshops at Ballarat and Bendigo.

In pursuance of the policy of decentralisation, arrangements were made for the establishment of Workshops at Ballarat and Bendigo for the manufacture and repair of locomotives and other rolling-stock.

The necessary land has been acquired, and the preparation of the sites is in hand, whilst plans for the buildings and specifications for the machinery and equipment are in progress.

It is anticipated that when these shops are in operation it will be possible to abolish the partial night-shift now being worked at the Newport Workshops, and eventually to discontinue the practice which has necessarily been in vogue for the past few years of having a considerable number of trucks manufactured by contract.

Country Passenger Train Services.

In conformity with the direction of the Government that at least one purely passenger train daily be run to and from Melbourne and every country town with a population of at least 2,000 inhabitants, a daily passenger service was established between Melbourne and the different towns accommodated by the train service on the following lines:—

Ararat to Hamilton,
Ballarat to Horsham,
Ballarat to Maryborough,
Bendigo to Kerang,
Maryborough to Mildura,
Murtoa to Warracknabeal,
Sale to Bairnsdale,
Woodend to Daylesford.

The provision of these purely passenger trains necessitated the running of a goods train on each section to deal with the goods business previously accommodated by the mixed trains.

The revenue derived from the running of these trains has not so far been commensurate with the outlay involved, but it is hoped that the acceleration in speed and the comfort and convenience provided for passengers will encourage traffic, and so justify the increased expenditure.

Improvement in Rolling Stock.

For many years there was an absence of any definite principle governing the types of rolling-stock, but of late an endeavour has been made to standardise the locomotive, carriage, truck and van stock, and at present the construction of new stock is limited to a minimum number of types of such design as experience has demonstrated is best suited for the requirements of the different services.

The standard types of locomotive are now limited to three classes, viz., the "A2" class for heavy passenger and express traffic, the "DDE" class for heavy suburban service, and the "DD" class which, although of large tractive power and suitable for goods, mixed, and passenger traffic on all lines, can be utilized on light country lines laid with 60-lb. rails. In anticipation of a reduction in the number of suburban locomotives, when the scheme of electrification is completed, the "DDE" engines have been so designed as to be readily convertible into tender locomotives of the "DD" class. All of these three classes are of similar design, 6-wheels coupled, with Belpaire fire-boxes and outside cylinders, and of tractive power to suit the different services, and they have been so designed as to admit of uniformity of manufacture of many of the parts with a view to simplicity in construction, economy in maintenance and repairs, and the use of a minimum number of patterns and duplicate parts. During the period from 1st January, 1911, to 30th June, 1913, 44 engines of the "A2" class, 60 of the "DD" class, and 25 of the "DDE" class, were constructed.

There were 244 engines of the three classes mentioned at 30th June, 1913, and this constituted about 36 per cent. of the total stock in existence at that date.

Since 1903, 148 obsolete locomotives of small tractive power have been broken up, sold, &c., and eight classes have thus been removed from the Register, whilst the demolition of old locomotives in several other classes is practically completed.

The standard carriages consist of 71-foot corridor cars for express and the more important country line traffic, of 58-foot corridor cars for other country lines, and of "Tait" cars for suburban lines; and since January, 1911, fifty 58-foot cars, 130 "Tait" cars, 2 sleeping cars, 1 State car, and 4 narrow-gauge cars, have been constructed, and the equivalent of 44 new bogie cars for suburban running has been provided by the lengthening of existing stock, whilst no less than 134 of the old type of fixed-wheel-base cars have been permanently withdrawn from passenger traffic.

The provision of the additional carriage stock has added materially to the comfort of passengers, both on the country and suburban lines, and whilst improved carriages have been in running for some years past on all the main lines, special attention has of late been devoted to the provision of more commodious accommodation on branch lines, and by means of the 58-foot corridor vestibule cars, and of the earlier type of corridor cars previously utilised on the more important branch lines, it has been possible to place corridor cars on the following sections:—

Bendigo to Korong Vale, Wycheproof, and Chillingollah,	Murtoa to Hopetoun,
Bendigo to Swan Hill,	Melbourne to Port Fairy,
Bendigo to Echuca,	Geelong to Ballarat,
Maryborough to Mildura,	Benalla to Yarrawonga,
Ballarat to Castlemaine,	Wangaratta to Bright,
Ballarat to Dimboola,	Wodonga to Tallangatta,
Ararat to Portland,	Melbourne to Numurkah and Cobram,
	Melbourne to Port Albert,

as well as on other less important lines.

Further improvements have been effected by the substitution of Pintsch Gas for oil lighting on several additional branch lines, and by a large increase in the stock of footwarmers for use in winter, whilst the Inter-State Express and a few other trains have been provided with ice boxes and ice coils, which enable a plentiful supply of iced drinking water to be maintained for passengers.

The work of improving the rolling-stock on the suburban passenger trains has steadily progressed, and the lines to Essendon, Sandringham, Dandenong, Frankston, Ringwood, Kew, Heidelberg, Reservoir, and Williamstown respectively have now been almost wholly equipped, either with the standard "Tait" car or with the earlier type of bogie car.

The types of truck stock have also been standardized, and for general goods traffic open steel trucks with a capacity of 15 tons are being manufactured, and 3,718 of these trucks have been constructed since January, 1911.

The additions which have been made in the rolling-stock are reflected by the following comparative statement:—

	At 30th June, 1903.	At 31st Dec- ember, 1910.	At 30th June, 1913.	Increase at 30th June, 1913, over 30th June, 1903.	Increase at 30th June, 1913, over 31st December, 1910.
No. of Locomotives ...	553	537	668	Per cent. 20·7	Per cent. 24·3
No. of Carriages (Bogie) ...	585	771	958	63·7	24·2
" " (Fixed-wheel base)	611	575	441	(decrease 27·8)	(decrease 23·3)
No. of Vans and Sundry Vehicles	440	502	676	53·6	34·6
No. of Trucks ...	9,814	11,723	15,868	61·6	35·3

In addition, the capacity of the suburban rolling-stock was increased by the lengthening of bogie cars so as to provide the equivalent of 44 new cars up to 31st December, 1910, and an additional 44 cars up to 30th June, 1913.

The full extent of the improvement, however, is not indicated by the foregoing figures, because of the greater tractive power of the new locomotives and the greater capacity of the other rolling stock. For example, the tractive power of locomotives increased during the ten years from 6,400,267 lbs. to 10,971,102 lbs., or by 71·4 per cent., and the carrying capacity of trucks from 93,295 tons to 190,099 tons, or by 103·7 per cent.

The average tractive power of the locomotives and the average carrying capacity of the trucks in existence at 30th June, 1913, were 17,738 lbs. and 12·2 tons respectively, as compared with 13,155 lbs. and 9·5 tons at 30th June, 1903. The average internal floor area of carriages and of van and sundry stock was increased during the same period from 272 and 184 square feet respectively to 353 and 238 square feet.

Supply of Steel Rails.

Contracts were entered into during the year for the supply of 3,300 tons of 100-lb., 21,034 tons of 80-lb., and 2,100 tons of 60-lb. steel rails, together with the requisite fastenings.

The 100-lb. and 80-lb. rails were required for the purpose of releasing lighter rails for the construction of new lines, for relaying and renewals generally, and for reserve stock. The 60-lb. rails were required principally for the manufacture of points and crossings.

Way and Works Branch.

The Way and Works were maintained in good order and repair throughout the year, *vide* the certificate of the Chief Engineer in Appendix No. 3.

The expenditure on the Maintenance and Renewals of Way and Works by contrast with that of each of the four preceding years was as shown hereunder :

	Year 1908-9.	Year 1909-10.	Year 1910-11.	Year 1911-12.	Year 1912-13
	£	£	£	£	£
Expenditure ...	625,602	643,912	803,658	893,350	930,366
Per mile of railway (average mileage) ...	184	187	229	252	256
Per mile of main track (open for traffic) ...	168	171	209	230	234

The policy of relaying light lines with heavier rails was continued, and during the year 207·8 miles of track were relaid with steel rails as follows:—

Description of Rails.	Miles of track relaid.
New 100 lb. ...	7·0
New 80 lb. ...	118·6
Serviceable 100 lb. and 80 lb. ...	1·8
Serviceable 75 lb., 66 lb., and 60 lb., released from other lines by the substitution of heavier rails ...	80·4
Total ...	207·8

The tracks were also strengthened by 9,180 additional sleepers, whilst 282,508 sleepers were renewed and 262 miles of fencing were rebuilt.

Twenty-four additional places were interlocked and 367 interlocking levers installed, making a total in use at 30th June, 1913, of 8,651 levers at 694 places and the proportion of interlocked places 72·22 per cent. Ninety-four sets of staff, tablet or Annett's Lock gear, were provided at 33 intermediate non-staff stations, and 130 sets of plunger locking gear at 56 staff stations.

The installation of improved safe working systems on the suburban lines was proceeded with as expeditiously as possible. The lines from East Richmond to Camberwell, Franklin-street Junction to Newmarket and to South Kensington, Flinders-street to Graham, and the main lines in Castlemaine Yard were track-locked, in addition to isolated sections in the Ballarat, Geelong and Kyneton yards, which it was considered desirable to so equip. Similar work is in hand between Newmarket and Essendon, and at Jolimont Junction on the Hawthorn, Oakleigh, and Brighton lines.

Twenty-two sections were equipped with electric staff and 85 sections were track-locked.

The station yards at Elsternwick, Hamilton, Mitcham, Ouyen, Wallan, Warburton, Woomelang, Williamstown, and Yarraville were re-arranged and enlarged, in order to admit of the efficient and economical conduct of business or for crossing purposes, and similar work is in hand at Benalla, Castlemaine, Cowie, Glenorchy, Guildford, Lilydale, Langi Logan, and Korong Vale.

New station buildings were erected at Croydon, Macedon, North Williamstown, Newport, Peshurst, Glenrowan, Sheep Hills, Spotswood, Sydenham and Westgarth, and are in course of erection at Albert Park, Dookie, Elaine, Riddell, Oakleigh, Heidelberg and Sunshine, whilst the station yards at the last-named three stations will be re-arranged and extended at the same time.

The duplication of the line from Westgarth to Alphington and the regrading of the line at South Geelong, including the substitution of an overhead bridge for the level crossing at Moorabool-street, were completed.

During the last few years the work of extending the passenger platforms, which is of considerable importance in the time keeping of trains, has been continued on different lines, and the whole of the platforms at the main suburban stations have now been lengthened to the standard of 425 feet, and the platforms on the North-Eastern, Goulburn Valley, Bendigo, North-Western, Eastern, Port Fairy, and South-Eastern lines have been extended as much as is considered necessary according to the length of the trains running on the respective lines.

The platforms on the lines between—

Castlemaine and Mildura,
Bendigo and Echuca,
Bendigo and Wycheproof,
Croydon and Healesville,
Eaglehawk and Swan Hill, and
Korong Vale and Ultima

will be similarly extended in the near future.

In order to admit of the use of heavier and more powerful engines, a number of bridges were strengthened on several lines, especially on the North-Eastern, North Western, and Western lines, and the construction of the new double track bridge over the River Yarra at Hawthorn and the renewal and strengthening of the bridge over the Maribyrnong River at Footscray are well in hand.

Rolling-Stock Branch.

The whole of the rolling-stock in use, and the machinery and tools, were maintained in good working order and repair—*vide* the certificate of the Chief Mechanical Engineer in Appendix No. 2—and inventories of the rolling-stock in existence at 30th June, 1913, based on numbers and capacity respectively, are embodied in Appendices Nos. 8 and 9.

In addition to the removal from the register of the rolling-stock which was scrapped during the year (Appendix No. 8), three workmen's sleeping cars and 30 old trucks were written down to the internal floor area and tonnage capacity respectively represented by their value as scrap material.

In pursuance of the programme of construction of locomotives to meet the continued expansion of traffic, the manufacture of locomotives and the assembling of parts made by contractors were proceeded with at the Newport workshops, and 45 new locomotives were turned out during the year.

In April, 1912, a contract was placed with Messrs. Walkers Ltd., Queensland, for the supply of 20 locomotives of the "DD" class, to be delivered by April, 1913. Owing chiefly to the late arrival from England and America of certain materials

which the Department undertook to supply, the stipulated times for delivery have been exceeded, but it is anticipated that the contract will be completed about the end of September.

In May, 1912, the tender of the Austral Otis Engineering Company was accepted for the supply of 20 "DD" class locomotives, to be followed by a contract for a further 20 locomotives of similar type, but in October, 1912, the Company signified its inability to proceed with the contract, and fresh tenders under similar conditions were thereupon invited, with the result that Messrs. Thompson & Co., of Castlemaine, secured the contract, under which 20 locomotives are to be delivered by the end of December, 1914.

Contracts to the value of £35,000 were let during the year to a number of Victorian firms for the supply of parts of rolling-stock; and also for the manufacture of 500 15-ton open goods trucks, of which 349 were delivered by 30th June, 1913.

The construction of new rolling-stock was actively proceeded with during the year in order to meet the necessities of both the passenger and goods business, and reached large dimensions, as indicated by the following statement, which also shows the anticipated output for the year 1913-14 :—

Description.	Output during 1912-13.		Anticipated Output during 1913-14.	
	At Newport.	By Contractors.	At Newport.	By Contractors.

* Car body and underframe made at Newport, and engine, boiler, &c., imported from England.

† Including those assembled at Newport from parts made by contract.

The two McKean gasolene rail motor cars have been utilized between Maryborough and St. Arnaud, and between Hamilton and Warrnambool, and have given satisfactory service within the limit of their capacity. The experience which has been gained, however, is sufficient to confirm the view expressed by us when the subject of their purchase was under consideration, that the total cost of running and maintenance would be higher than that involved in the case of a light locomotive and train, capable of at least equally satisfactory service.

The Great-Western steam car has also been running a few months, but not for a sufficient period to enable a definite opinion to be expressed as to its comparative value.

The new workshops store and extension to the tarpaulin shop at Newport were completed, and the new truck construction and repair shop, the extension to the wheel shop, new forge and spring shop, and template store were approaching completion at 30th June.

In accordance with the established policy of decentralization, the amount of repair work has been considerably augmented at Ararat, Ballarat, Ballarat East, Benalla, Bendigo, Colac, Korumburra, Maryborough, Seymour, Stawell, Traralgon, and Wonthaggi. At Geelong, however, the additional work proposed cannot be undertaken until the new engine shed and other accommodation about to be taken in hand are completed.

Stores Branch.

The value of the Stock of Stores at 30th June, 1913, as per the certificate of the Chief Storekeeper (*vide* Appendix No. 4) was £849,462, being an increase of £202,459 as compared with the value of the Stock of Stores at 1st July, 1903, and an increase of £206,395 as compared with the value as at 1st July, 1912.

Dining Car and Laundry Services.

The patronage of the Dining Car Service continued to increase, and the revenue derived on each of the lines on which the service is provided is contrasted hereunder with the figures of the previous year:—

	Year 1911-12.	Year 1912-13.	Increase 1912-13.
	£	£	£
Sydney Express	7,916	8,808	892
Adelaide Express	5,249	5,611	362
Mildura Line	1,056	1,156	100
Total	14,221	15,575	1,354

The Departmental Laundry continued to yield satisfactory results, and the expense involved in its provision has been amply justified.

Ambulance Organisation and Equipment.

A careful re-organisation of the system of furnishing "First Aid" relief to passengers in the event of an accident has been made and perfected during recent years, and the equipment which has been provided at the different stations, and in the vans of trains is as follows:—

Stretchers	1,176
Hand Litters	10
Ambulance Boxes	605
Medical Chests	67
Fire Extinguishers	670

The training of the staff in ambulance work has also been continued as far as possible, and 2,826 officers and employes now hold certificates issued by the St. John Ambulance Association, whilst between 3,000 and 4,000 other officers and employes have acquired a valuable knowledge of First Aid work.

Forty-five Ambulance Corps are in existence at the principal railway centres of the State, and the annual competitions for prizes offered by the Department for both team and individual First Aid work have proved an interesting and effective means of stimulating interest amongst the staff.

Employment of Conductors on Country Passenger Trains.

The extension of the system of employing conductors on country passenger trains has proved satisfactory alike to the Department and to the travelling public. The system has facilitated the running of the trains, and has rendered it possible to maintain greater efficiency in the checking of tickets and the detection of fraud, and thus tends to prevent irregularities, whilst there is no doubt that the additional attention devoted to the requirements of passengers is generally appreciated.

Visit of the Chairman of Commissioners and Officers to Europe and America.

In view of the conversion of the railways from steam to electric traction and of the facilities which will thus be afforded for the adoption of some system of automatic signalling, it was considered that the interests of the State would be best served by an investigation of the different systems in operation in Great Britain, Europe, and America by responsible departmental experts who are thoroughly conversant with local conditions, and it was accordingly arranged that the Chairman of Commissioners, Mr. W. F. Fitzpatrick, C.M.G. ; the Engineer of Signals, Mr. F. M. Calcutt ; and the Superintendent of Goods Train Service, Mr. E. C. Blazey, should visit those countries and personally investigate the different systems in vogue and then confer with Mr. Merz on the subject. Messrs. Calcutt and Blazey sailed from Melbourne on 11th March, and Mr. Fitzpatrick on 8th April, 1913.

We feel convinced that the knowledge and experience which the Chairman and these two officers will acquire, not only in respect of automatic signalling and safe working installations, but also in connexion with railway operations generally, will be of material benefit to the State, and we trust that it will be possible to periodically send officers in responsible positions to Europe and America, in order to gain experience and acquire a first-hand knowledge of the evolution of railway problems and methods.

Acknowledgment of Services of Staff.

The Staff continued to perform their duties in a satisfactory manner, and we desire to express our thorough appreciation of the valued assistance and good service rendered by the Officers and Employés generally.

Appendices.

The Balance-sheet for the year, and Capital, Revenue, and Expenditure Accounts and Statements, as well as statistical and other information, statistical diagrams, and maps, are embodied in the Appendices, a list of which is given on page 24.

We have the honor to be, Sir,

Your obedient Servants,

C. E. NORMAN, } Victorian Railways
L. McCLELLAND, } Commissioners

APPENDIX No. 1.

HEADS OF BRANCHES.

Acting Secretary	Mr. E. B. JONES.
Chief Mechanical Engineer	" W. M. SHANNON.
Chief Engineer of Way and Works	" J. H. FRASER.
General Superintendent of Transportation	" C. MACAW.
Chief Electrical Engineer	" W. STONE.
Chief Accountant	" J. W. HACKER.
Deputy General Passenger and Freight Agent	" W. E. KEAST.
Telegraph Superintendent	" W. A. HOLMES.
Chief Storekeeper	" G. H. SUTTON.
Auditor of Receipts	" W. G. RITCHIE.
Superintendent of Printing	" A. VALENTINE.

APPENDIX No. 2.

CERTIFICATE RESPECTING ROLLING-STOCK, MACHINERY, AND TOOLS.

I hereby certify that the whole of the rolling-stock in use on the Victorian Railways, and also the machinery and tools of the Rolling-Stock Branch, were, during the year 1912-13, maintained in good working order and repair.

W. M. SHANNON,

Chief Mechanical Engineer.

APPENDIX No. 3.

CERTIFICATE RESPECTING WAY AND WORKS.

I hereby certify that the whole of the permanent way, stations, buildings, piers, wharfs, and other works on the Victorian Railways were, during the year 1912-13, maintained in good working condition and repair.

J. H. FRASER,

Chief Engineer of Way and Works.

APPENDIX No. 4.

CERTIFICATE RESPECTING STORES.

I hereby certify that the Stock of Stores has been carefully and systematically inspected during the year, and that its value at 30th June, 1913, was £819,461 17s. 9d.

GEO. H. SUTTON,

Chief Storekeeper.

W. M. SHANNON,
Chief Mechanical Engineer.

APPENDIX No. 9.

INVENTORY OF ROLLING-STOCK AT 30TH JUNE, 1913.—CAPACITY, ETC.

	Built or purchased and charged to Capital from the inception of the Railways up to 30th June, 1913.	In existence at 30th June, 1913 (a).	Deficiency.	Surplus.	Cost of making good Deficiency.	Value of Surplus.
Locomotives (tractive power)	11,368,737 lbs.	10,971,102 lbs. (b)	397,635 lbs.	...	£ 79,527	£ ...
Carriage Stock (floor area)	467,922 sq. ft.	457,278 sq. ft. (c)	10,644 sq. ft.	...	39,383	...
Van Stock (floor area)	114,896 sq. ft.	118,378 sq. ft. (d)	...	3,482 sq. ft.	...	8,705
Sundry Stock (floor area)	20,751 sq. ft.	21,349 sq. ft. (e)	...	598 sq. ft.	...	1,196
Truck Stock (carrying capacity)	185,873 tons	190,099 tons (f)	...	4,226 tons	...	54,938
					118,910	64,839

Excess of cost of making good Deficiency over Value of Surplus £54,071
 Amount at Credit of Rolling-Stock Replacement Fund at 30th June, 1913, available for replacement of Rolling-Stock 54,519

- (a) Equivalent tractive power is included in these figures to represent the expenditure charged to Rolling-Stock Replacement Fund on Locomotives under construction, but not completed at 30th June, 1913.
 (b) 80 locomotives have been written down to the tractive power represented by their value as scrap materials.
 (c) 118 vehicles have been written down to internal floor area represented by their value as scrap materials, and 244 vehicles have been written down to half area. Only 60 per cent. of internal floor area of 18 cars and 50 per cent. of 2 sleeping cars included on account of these vehicles being owned jointly with the South Australian Railways.
 (d) 3 vehicles have been written down to internal floor area represented by their value as scrap materials, and van compartments of 57 combined cars and vans have been written down to one-half internal floor area. Only 60 per cent. of internal floor area of 4 luggage vans and 3 mail vans included on account of being owned jointly with the South Australian Railways.
 (e) 117 vehicles have been written down to internal floor area represented by their value as scrap materials.
 (f) 315 "L," 146 "N," 67 "K," 26 "H," 16 "TH," and 16 "Q" trucks have been written down to tonnage represented by their value as scrap materials.

W. M. SHANNON,
 Chief Mechanical Engineer.
